

1

Question: What is the primary purpose of the "Complete Data Structures and Algorithms Guide"?

- A) To teach users how to build and develop software applications.
- B) To help users improve their problem-solving skills and ace technical coding interviews, especially at FAANG companies.
- C) To provide a comprehensive overview of computer science concepts.
- D) To encourage users to explore different coding frameworks.

Correct Answer: B

2

Question: According to the guide, approximately how many practice questions should a user solve to feel confident approaching new problems?

- A) 20-30
- B) 75-90
- C) 150-200
- D) 500+

Correct Answer: C

3

Question: Which of the following data structures is described as storing objects in nodes in a "snake-like" structure?

- A) Array

- B) Hash map
- C) Linked list
- D) Tree

Correct Answer: C

4

Question: Which approach is recommended for finding subsets or elements in a sorted array?

- A) Sliding Window
- B) Binary Search
- C) 2 Pointers
- D) Recursion

Correct Answer: C

5

Question: What is described as "backtracking + memoization"?

- A) Recursion
- B) Dynamic Programming
- C) Sliding Window
- D) Binary Search

Correct Answer: B
