Dear Students,

Congratulations on being a part of the DRID sub-projects.

However, if you get an internship offer from a corporation, you are encouraged to join so as to gain corporate experience. Inform me so that appropriate measures can be taken.

If you can continue working on these sub-projects alongside, you will be given a letter of appreciation. In this situation too, inform me so that your workload can be adjusted accordingly.

Your sub-topic will be listed shortly and you can then start concentrating on that domain particularly. You might be associated with another groups too. In the meantime, you are expected to start learning about game engines and start development of some small games as well.

Best wishes

Dr. **Suma Dawn**
